1. Write a report on the safety and security in NIT Silchar Campus.

Safety and Security in NIT Silchar Campus

- Subhojit Ghimire, NIT Silchar

Founded in 1967 as a joint venture between the Government of India and the State Government of Assam to cater to the country's need for manpower in technology, the Regional Engineering College at Silchar was granted Deemed University status and was renamed as the National Institute of Technology, Silchar, in 2002. It was declared as the Institute of National Importance under the National Institutes of Technology Act, 2007. In such an institute, the safety and security management is of utmost vitality. Safety and security are important terms that are associated with the protection of a person, organisation, and properties against external threats that are likely to cause harm.

The compound of NIT Silchar encloses various educational buildings along with student hostels and staff quarters. The primary safety has been maintained through the flawless infrastructures, which can withstand the direst of situations. Every primary structure is guarded by the team of security guards for the protection and safety of students and staffs. The landmark or the location itself provides a suitable area for the establishment of the institute. The campus has been secured with the placements of CCTV cameras to prevent the worst from happening. Moreover, not only the physical security of the institute is challenging, but the cyber-security of NIT Silchar is also equally secured.

Despite having all the genius safety-mind to work, NIT Silchar still has some shortcomings. For instance, the institute is rich in terms of open lakes, which despite being checked regularly, is not a safe aspect from the perspective of safety and security enforcements. The other problem with NIT Silchar is the immediate medical treatment. Despite having a dispensary within the compounds of the institute, it cannot operate on higher health risks. However, this problem is overcome by the nearby hospitals in case of extreme health risks.

In conclusion, the National Institute of Technology Silchar has managed to oversee every possible risk factors and has prepared the respective officials accordingly. Every student and staff can feel safe within the compounds of NIT Silchar.

There are, of course, many safety areas to improvise on, but the institute has successfully enforced the safety measures in regard to current situations. With the on-going progress still in mind, NIT Silchar will do very well in the nearing future. The security level in NIT Silchar can reach peak potential and can become extremely challenging.

2. Prepare a poster to spread awareness about plastic pollution.

Plastic Pollution- A Global Threat

Subhajit Ghimire, Department of Computer Science and Technology, N.I.T. Silchar

Overview:

- > Pollutes and upsets existing ecosystem
- > Adversely affects wildlife, wildlife habitat and humans
- > Major Pollutant- Plastic (micro-, meso-, or macro debris)
- > Traps water and acts as breeding place for diseases

Do's:

- > Find alternatives to plastic
- > Make use of reusable plastic bottles
 - > Proper waste disposal
- > Recycling, Reusing and Reducing the use of plastic
- > Strictly following Government policies

3. Write the precis of the following passage with suitable title:

A precis is a summary or the gist of the main ideas of written matter. In order to make a summary of an article, a speech or a story, one has to read it carefully and grasp its meaning. Precis-writing forces one to concentrate on the material which is to be summarised. In summarising a passage, though the length of the summary is not fixed, it is generally expected that the summary would be one third the length of the passage. The summary is known as precise and precis writing means summarising. It involves preparing the content concisely to convey the essential ideas contained in a longer passage or article. At the same time, the essential points of the main passage must be presented in the precise in such a manner that the reader may easily grasp the main ideas of the passage. The primary object of precis writing is to present facts and information to spend time on reading unnecessary details. The necessity of speedily reading documents mainly arises in business firms and government departments besides other fields of activity. The importance of precis writing in business lies in the economical way of recording and presenting lengthy documents in compressed form. Busy executives and managers in large organisations can get in the precis all the essential points and thus can avoid the time-consuming process of going through long correspondence, reports, etc.

Precis Writing

A precis is a summary or the gist of the main ideas. In order to make a summary of any writing, one has to focus on material which holds meaning. The summary of the passage is expected to be one third the length of the original content. The precis should convey essential ideas like facts and information while speedily reading. In business fields, busy executives and managers should get all essential points in economical way through precis without going through long correspondences, reports, etc.
