	CASE STUDY: TO CREATE LO BOUNCING BALL AND 20 FACTAL
ELEMANIST STATE OF THE STATE OF	EXPRESSION ANIMATION USING TOOLS PROVIDED
en a pilot er sekumbili en rapplach i ur enn spers til h	IN SYNFIG STUDIO SOFTWARE.
	PROCEDURE:
7.	The Synfig Studio Software was opened.
2.	By default, a new workspace was created.
3	To create a background, we selected the rectangular
	tool and created a rectangular box as per our
	requirement.
4	. We selected the colour of the background using color
	tool and chose Black > fill.
5.	We changed the foreground colour to red and background
	color to white and selected circle tool to draw a
	circular ball on the workspace.
6	We changed the time duration as well as the frame
	rate of our animation from Canvas -> Properties -> Time.
7	. On top of the timetrack bar, on the right hand side,
	we can toggle the animation made onlost by selecting
	the 'man' shaped button. We toggled the animation
	mode on.
8	. On the same bar as animation mode, we toggled
	the default interpolation to 'linear', as our ball
	bounces linearly. For the facial expression, we
	selected the 'clamped' interpolation.
9	. The bottom left menubar was loaded with keyframes
	panel to add new keyframes at required time stamps.
10	. The position of the ball was changed at different time
3	interval, along with the shape of the ball from the

tingbar at bottom of the timetrack panel. Similarly, for facial expression, similar process was repeated by selecting facial objects like eyes, lips, eyebrows etc. 11. After making the necessary changes and giving life to the still objects and figures, the animate editing mode was toggle off and the animation	
was played previoused. 12. Finally, the animation output was exported as a video file to the local machine.	
Concluston: We learnt animation techniques and tools available on Synfig Studio and animated a bouncing ball and a smiling face.
